DETAILED ACTION

1. An Amendment was filed 9/22/03 in which Claims 2 and 10 were also cancelled.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Darby et al 5835873 in view of Byon 5847472.

Darby discloses device 100 for sensing an object/person in a vehicle interior comprising
Sensor (col 11, lines 4-5) for object/person,
Impact sensor 340,
Non-volatile memory 360 (col 11, lines 35-36) storing sensor data,
Controller 200 for occupant protection means 410, and,
Main controller 310.

The reference does not disclose the main controller as storing sensor data, or activation/impact data transmitted via an interface, into memory, while Byon shows these features in col 6, line 61, to col 7, line 2. This excerpt discloses

The controller storing sensor data into memory in col 6, lines 63-64, and,
The controller storing impact data into memory in col 6, line 66, to col 7, line 1.

It would have been obvious to one with ordinary skill in the art at the time the invention was made to include these features, as shown in Byon, to provide a more comprehensive record of the operation of the protection system, so to serve as an accurate chronological record for subsequent review for improvements, or for insurance/claim purposes, etc.

Art Unit: 3611

3. **Claims 5-9, 11 and 12** are allowable because prior art does not disclose a vehicle occupant protection apparatus comprising, *inter alia*,

a device for sensing an object/person disposed separately from a control device for the protection device, the sensing device including a memory, and a control unit connected to the memory for storing data from the control device.

4. RESPONSE TO REMARKS

Examiner reiterates her rejections of Claims 1, 3 and 4 as discussed above. Darby, in view of Byon, clearly discloses the recited elements. Applicant is asked to note allowable subject matter, and distinguishing language between allowable Claims 5/9 and rejected Claim 1.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
